

Listing Content

Listing content is everything an applicant sees about a property. Set it here so the public listing looks right.

“ ? Screenshot: a property's listing content.

Amenities

Add the amenities the property offers. You can add a **custom amenity**, or remove one you no longer need.

Call-to-action buttons

Set the property's action buttons in their **Slots** — the labels applicants tap to contact or apply. Select **Discard Changes** to drop edits you have not saved.

Flyers

Manage the property's flyers. Search and filter by **Type** and **Status** to find one.

Special offers

Add the offers an applicant should see. Search and filter by **Type** and **Status** the same way.

Each part feeds the public listing, so keep it current and accurate.
