

Neighborhoods & Places

Neighborhoods are the locations your properties sit in. Set them up so listings show the right area and nearby places.

“ ? Screenshot: the Neighborhoods list.

Neighborhoods

The list shows each neighborhood with its **City, State**, how many **Properties** it holds, its **Highlights**, and when it was **Created**. Use the **Filters** to narrow the list.

Add or edit a neighborhood to set its location and highlights.

Neighborhood Places

Neighborhood Places are the establishments near your neighborhoods — the spots you show on a listing. The list shows each place with its **City, State** and the **Neighborhoods** it belongs to.

Add a place and link it to one or more neighborhoods. A place with no location reads *"No city yet."*
