

Unit Types

Unit Types is the master list of unit-type labels every property draws from. Set them here so all properties use the same names.

“ ? Screenshot: the Unit Types list.

Read the list

The list shows each unit type with its **Bedrooms** count, its **Status**, and **Actions** to edit it.

Add or edit a unit type

Add a unit type and set its label and **Number of Bedrooms**. Set its status to control whether properties can use it.

These labels feed each property's own unit types. See [Units & Unit Types](#).
