

Messages

Messages is where you talk with the LeaseOps team about your applications. Each conversation is a **thread**, so replies stay together in one place.

“ ? Screenshot: the Messages inbox.

Find a conversation

Your threads sit in a list, grouped so the important ones surface first:

- **Unread** — threads with new replies.
- **This week** — recent threads.
- **Open threads** — everything else still open.

To find one thread, search by name, unit, or message text.

A brand-new inbox reads "**No conversations yet.**"

Read and reply

1. Select a thread to open it.
2. Type your reply in the box at the bottom.
3. To send a file, select **Attach file**.
4. Select **Send**.

An empty thread reads "**No messages yet. Start the conversation.**"
